

MALITH YASINTHA

Software Engineering Undergraduate | MERN Stack Developer

+94-788-193-324 | malithyasintha21@gmail.com

 [Malith Yasintha](#) |  [malith21](#) |  [Portfolio](#)

OBJECTIVE

Seeking a challenging position in the field of Information Technology to leverage my skills in web development, programming, and analytical problem-solving. Eager to contribute to innovative projects that combine software engineering and data-driven solutions, with a focus on developing efficient web applications and solving real-world problems.

KEY COMPETENCIES

- Problem Solving & Logical Thinking
- Requirement Analysis
- Software Design & Development
- Data Analysis & Data Handling
- Continuous Learning
- Object-Oriented Programming (OOP)
- Algorithmic Thinking
- Teamwork & Communication
- Version Control & Collaboration
- Debugging & Troubleshooting

EDUCATION

- **Sri Lanka Institute of Information Technology (SLIIT), Malabe** 2023 – Expected 2027
BSc (Hons) Information Technology (Undergraduate) Sri Lanka
 - Currently in 3rd Year
- **Sri Dharmaloka College, Kelaniya** Sri Lanka
G.C.E. Advanced Level (2022) & G.C.E. Ordinary Level (2019)
 - A/L Stream: Physical Science
 - Subjects: Combined Mathematics (S), ICT (C), Physics (S)
 - O/L Results: 6 A's and 3 B's

PROJECTS

- **i-Computers E-Commerce System – (Personal Project)** 2026-ongoing
Tools: MongoDB, Express.js, React.js, Node.js, JWT, bcrypt 
 - Independently developed a full-stack e-commerce platform for managing and showcasing computer products.
 - Implemented secure user registration and login functionality using JWT authentication and bcrypt password hashing
 - Developed complete CRUD operations for product management, including product creation, updates, deletion, and retrieval
 - Designed and integrated RESTful APIs to enable seamless communication between the React frontend and Node.js backend
 - Built responsive and reusable React components to provide a modern and user-friendly shopping experience
 - Applied middleware-based authorization and protected routes to enhance application security and access control
- **Animal Clinic Management System – MERN Stack (Group Project)** July 2025 – November 2025
Tools: MongoDB, Express.js, React.js, Node.js 
 - Developed the Payment and Billing module for managing financial transactions
 - Implemented invoice generation, payment validation, and transaction tracking
 - Integrated frontend and backend using RESTful APIs
 - Ensured secure data storage and efficient database operations using MongoDB
- **Online Voting System – Web Application** June 2024
Tools: HTML, CSS, JavaScript, PHP, MySQL 
 - Developed a secure online voting platform with user registration and login authentication
 - Implemented vote casting functionality with validation to prevent duplicate voting
 - Designed backend logic and integrated database for real-time vote counting
 - Ensured data integrity and secure handling of user information

• Examination Management System – MVC Based Web Application

January 2025

Tools: Java, MySQL

- Developed a web-based system using MVC architecture to manage exams and student records
- Implemented full CRUD operations for efficient data management
- Applied validation techniques to ensure accurate data handling
- Maintained clear separation between Model, View, and Controller for scalability

• WellnessMate – Android Wellness Application

2025

Tools: Kotlin, Android Studio

- Developed a mobile application to support physical and mental wellness tracking
- Implemented features such as habit tracking, hydration reminders, and mood journaling
- Designed intuitive UI using Fragments and Bottom Navigation
- Enhanced user experience through efficient module navigation and performance optimization

• Smart Campus Operations Hub – Full Stack Management System

2026

Tools: Spring Boot, React, MongoDB

- Developed a full-stack campus management system using Spring Boot and React
- Implemented OAuth-based authentication and Role-Based Access Control (RBAC)
- Designed a booking system with time conflict detection and approval workflow (Pending, Approved, Rejected)
- Built maintenance ticketing system with priority handling and comment-based communication
- Integrated real-time notifications for booking updates and ticket status changes

• SkillNest.lk – Academic & Resource Management System

2026

Tools: MongoDB, Express.js, React, Node.js

- Developed a MERN stack application for managing academic resources and student support services
- Implemented JWT-based authentication with role-based access (Admin, Tutor, Student)
- Built ticketing system with real-time chat using Socket.IO and status lifecycle management
- Designed resource-sharing module with upload, search, filtering, and bookmarking features
- Integrated AI-based notes summarization for generating key insights from study materials

SKILLS

- **Programming Languages:** Java, JavaScript, TypeScript, C#, Python, PHP, Kotlin
- **Frontend Development:** React.js, HTML5, CSS3, JavaScript, Responsive Web Design
- **Backend Development:** Node.js, Express.js, Spring Boot, ASP.NET, RESTful API Development
- **Database Technologies:** MongoDB, Mongoose, MySQL
- **Authentication & Security:** JWT Authentication, bcrypt Password Hashing, RBAC, Protected Routes
- **Mobile Development:** Android Development (Kotlin), Android Studio
- **Frameworks & Architectures:** MERN Stack, MVC Architecture, Full-Stack Development
- **Tools & Platforms:** Git, GitHub, VS Code, Visual Studio, Postman, NPM, MySQL Workbench, XAMPP, Eclipse, RStudio
- **Software Engineering Concepts:** Object-Oriented Programming (OOP), Data Structures & Algorithms, CRUD Operations, API Integration, Software Design Principles
